Screen Display Guide

| Startup Screen		Displays a smiley face, then the total output when the charger is connected to power.
Total Output		Tap the touch button to display the total output when the screen is off.

100W MAX		Displays "100W MAX" when the total output exceeds 95W.
Power Distribution		Displays the current power distribution when a port's power changes. Tap the touch button to switch to the power distribution screen on the total output screen.
Temperature Monitoring		Tap the touch button to display the current temperature status.
Total Operating Time		Displays the total operating time of the charger. • Activates after the charger has been in use for more than 1 hour.

| Idle Screen | | Displays an idle face when the charger is powered on but not charging. |
