⚠️ i IMPORTANT SAFETY INSTRUCTIONS

This document does not contain all of the safety measures for operation of this device because special operating conditions, local code requirements or local regulations may necessitate further measures. However, it does contain information which must be adhered to for your own personal safety and to avoid material damage. This information is highlighted by a warning triangle with an exclamation mark or a lightning bolt depending on the degree of actual or potential danger.

Warning

This indicates that failure to observe instructions can result in death, serious injury or considerable material damage.

Caution

This indicates a risk of electric shock and failure to take the necessary safety precautions will result in death, serious injury or considerable material damage.

Qualified Personnel

Installation and operation of the device described in this document may only be performed by qualified personnel. Only people that are authorized to install, connect and use this device, who have the proper knowledge about labeling and grounding electrical equipment and circuits and can do so in accordance with local (safety) regulations, are considered qualified personnel in this document.

Use for the Intended Purpose

This device may only be used for the application cases specified in the catalog and the user guide and only in connection with devices and components recommended and approved by Anker.

Proper Handling

The prerequisites for reliable operation of the product are proper transport, storage, installation and connection, as well as proper operation and maintenance. During its operation certain parts of the device might carry dangerous voltages.

- Only use insulated tools suitable for the voltages this device is used for.
- Do not connect while the circuit is connected to a power or current source.
- Only place the device in a dry environment.
- The device is intended to be installed in a Mechanical Environment 'M1', with shock and vibrations of low significance and Electromagnetic Environment 'E2', as per 2014/32/EC Directive. The device is intended for indoor use. The device shall be installed inside a suitable IP rated enclosure, in accordance with local codes and regulations.
- Do not mount the device in an explosive area or exposed to dust, mildew and/or insects.
- Make sure the used wires are suitable for the maximum current of this device.
- Make sure the AC wires are connected correctly before activating the current/voltage to the device.

- Do not touch the device's ports directly with your bare hands, with metal, blank wire or other conducting material as you will risk an electric shock that could cause possible injury, serious injury or death.

- Maintenance and repair of the device should only be carried out by qualified personnel.

- Never break any seals (if present on this device) to open the cover as this might influence the functionality or accuracy of the device, and will void all warranty.

- Do not drop, or allow physical impact to the device as there are high precision components inside that may break and affect the device measurement negatively.

- Make sure the cables are connected securely to the ports.

- This device is compatible with smart meters that comply with DSMR 5.0. When connected to a smart meter using DSMR 5.0, the device can be powered via the P1 port. If connected to a smart meter using DSMR 4.0 or an earlier version, an external power supply is required (such as USB powering). Always confirm the DSMR protocol version of your smart meter before connection to determine if an external power supply is necessary

- If USB powering is required, use a power adapter (5V / 1A, USB-A to USB-C) that is CE-certified and complies with EU electrical safety and electromagnetic compatibility (EMC) standards.

- Installation must comply with all relevant local regulations and standards.

- Place the device in an enclosure with adequate IP protection. Do not expose the device to liquids as it is rated IP20 and is not waterproof.

- Use the device within the temperature range of -25°C to 55°C.

- Avoid exposing the device to strong vibrations or impacts.

Notice

Declaration of Conformity

Hereby, Anker Innovations Limited declares that this equipment is in compliance with Directives 2014/53/EU & 2011/65/EU. The full text of the EU declaration of conformity is available at the following internet address: https://support.anker.com/s/articleRecommend?otherType=Anker_EN_Extemal_Manual_and_Download&secondType=doc.

Maximum output power: +4dBm (For EU)

Frequency band: 2.4G band (2.4000GHz - 2.4835GHz)

UK PSTI Statement

Hereby, Anker Innovations Limited declares that this equipment is in compliance with the Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023. The full text of the Statement of Compliance is available at the following website: <https://www.anker.com/uk/psti-related>

⚠️ i CONSIGNES DE SÉCURITÉ IMPORTANTES

Ce document ne contient pas toutes les mesures de sécurité pour l'utilisation de cet appareil, car des conditions de fonctionnement particulières, des exigences locales ou des réglementations locales peuvent nécessiter des mesures supplémentaires. Il contient toutefois un certain nombre d'informations qui doivent être respectées pour assurer votre propre sécurité et éviter des dommages matériels. Ces informations sont mises en évidence par un triangle d'avertissement avec un point d'exclamation ou un éclair, selon le degré de danger réel ou potentiel.

Indique que le non-respect des instructions peut entraîner la mort, des blessures graves ou des dommages matériels considérables.

Indique un risque de choc électrique. Le non-respect des précautions de sécurité nécessaires entraînera la mort, des blessures graves ou des dommages matériels considérables.

Personnel qualifié

L'installation et l'utilisation de l'appareil décrit dans ce document ne peuvent être effectuées que par du personnel qualifié. Seules les personnes autorisées à installer,
